Education

National Institute Of Technology, Rourkela

Master of Technology in Signal and Image Processing

2025 – 2027

Rourkela, India

Guru Ghasidas University, Bilaspur

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.5

2020 – 2024

Bilaspur, India

Jawahar Navodaya Vidyalaya, JNV Sitamarhi

Matriculation CBSE, CGPA: 8.8

2017

Sitamarhi, India

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Computer Vision
- Software Methodology
- Database Management
- Computer Architecture
- Soft Computing

Experience

Autobot Robotics

May 2023 – Aug 2023

Machine Learning Intern

Remote

- Mentored and guided a junior intern, imparting mastery in ML fundamentals, Data Manipulation, Numpy, and Pandas.
- Developed and deployed (Django) 4 ML/DL projects with models that may be integrated into company robots.

Ziroh Labs [Source Link](#)

Jan 2022 – Feb 2022

Team Leader - Academic Alliance Program

Remote

- Fostered strong mentor-team connections, facilitating seamless communication and collaboration.
- Successfully led a team of 5 to achieve project completion ahead of schedule, consistently meeting deadlines.

Key Projects

K-HOG Unsupervised Keyframe Identifier (K-HUKI) [Source Link](#) | Python, Computer Vision, ML

2023

- Built keyframe extraction system with HOG Features and Unsupervised Learning achieving 96.45% accuracy.
- Developed preprocessing architecture 11 times faster than ResNet-based approaches with real-time processing.

IBYD Technology — Warehouse PathMapper [Source Link](#) | Python, Algorithms, Data Analysis

2023

- Created dynamic warehouse mapping software using advanced heuristic algorithms for optimal pathfinding.
- Achieved sub-second path calculations for thousands of locations with user-friendly navigation interface.

Apna Gold Solutions - Multi-Tenant SaaS Platform [Source Link](#) | Django REST API, React Vite, JWT April 2025 – Present

- Developing multi-tenant B2B2C platform with seller registration, KYC verification, and customer subscription plans.
- Implemented custom JWT authentication with database conflict resolution and secure tenant data isolation.
- Built notification systems, OTP verification, and real-time status tracking for complex business workflows.

Achievements

Intermediate Winner — Awaiken Hacks 2023 [Source Link](#): Innovative tool using Mediapipe for real-time action analysis in education with precise feedback on posture and motion

Rank 1 — Girlsript Bilaspur Hackathon "Hack4CG" [Source Link](#): Won top honors for Facial Emotion Recognition project addressing depression vulnerability in modern society

Leadership / Extracurricular

Google Developers Student Club

3rd Year

Vice President

Guru Ghasidas University

Technical Skills

Languages: Python, C, C++, HTML

Developer Tools: VS Code, Git, Anaconda, GitHub

Technologies/Frameworks: Flask, Django, Computer Vision, NumPy, Pandas, TensorFlow, Scikit-learn, OpenPYXL

Specializations: Machine Learning, Deep Learning, Natural Language Processing, Large Language Models, Data Analysis, Data Structures & Algorithms, Artificial Intelligence
