Education

National Institute Of Technology, Rourkela <i>Master of Technology in Signal and Image Processing, CGPA: 8.28</i>	2025 – 2027 <i>Rourkela, India</i>
Guru Ghasidas University, Bilaspur <i>Bachelor of Technology in Computer Science and Engineering, CGPA: 8.5</i>	2020 – 2024 <i>Bilaspur, India</i>
Jawahar Navodaya Vidyalaya, JNV Sitamarhi <i>Matriculation CBSE, CGPA: 8.8</i>	2017 <i>Sitamarhi, India</i>

Technical Skills

Languages: Python, C, C++, SQL, TypeScript, HTML/CSS
ML & Systems: Polars, CatBoost (GPU), LightGBM, RapidFuzz, PyTorch, Scikit-learn, OpenCV, CUDA
LLMs & Frameworks: LangGraph, Gemini API, LiteLLM, llama.cpp, FastAPI, Django REST, Next.js, Streamlit, Supabase
Specializations: Machine Learning, LLMops, Multi-Agent Systems, Computer Vision, High-Scale Data Pipelines

Experience

Autobot Robotics <i>Machine Learning Intern</i>	May 2023 – Aug 2023 <i>Remote</i>
- Mentored junior interns, imparting hands-on mastery in ML algorithms, data manipulation, and exploratory data analysis. - Developed and deployed 4 production-grade ML/DL model services in Django for robotic system integration.	
Ziroh Labs <i>Team Leader - Academic Alliance Program</i>	Jan 2022 – Feb 2022 <i>Remote</i>
Led a cross-functional team of 5 engineers to deliver core image processing pipelines ahead of deadline schedules.	

Key Projects

Amazon ML Challenge 2026 — Entity Resolution Engine GitHub <i>Python, Polars, CatBoost GPU, LightGBM, RapidFuzz20</i>	
- Engineered end-to-end production entity resolution pipeline over 24.2M records using Polars lazy execution and multi-view blocking. - Built 14-dim C++ RapidFuzz feature extraction engine; trained CatBoost GPU and LightGBM with Isotonic calibration achieving Macro F0.5 = 0.9719.	
Uplan — Adversarial Document Intelligence Pipeline Space <i>Python, Gemini API, LangGraph, Streamlit</i>	2025
- Architected adversarial multi-agent workflow in LangGraph with Gemini 2.5 Pro specialists; reduced manual review load by 85%. - Engineered semantic metadata graph using Gemini 2.0 Flash (98% token compression) paired with zero-hallucination rule validation.	
Alternative Data Radar GitHub <i>TypeScript, Next.js, Supabase, Bright Data, LLM APIs</i>	2026
- Engineered automated collection pipeline gathering careers and pricing signals via Bright Data Web Unlocker infrastructure. - Extracted structured corporate signals using Zod validation; computed 0–100 corporate health score displayed in Recharts UI.	
IBYD Technology — Warehouse PathMapper Video <i>Python, Heuristic Routing, Graph Algorithms</i>	2023
Delivered dynamic warehouse mapping solution, scaling routing heuristics to 10,000×10,000 grids in under 0.5s for 10,000+ locations.	
Apna Gold Solutions — Multi-Tenant SaaS Platform Live <i>Django REST API, React Vite, JWT</i>	2025
Developed multi-tenant B2B2C platform with seller KYC verification, customer subscription management, and tenant isolation.	
CodeAtlas — AST Architecture & Bottleneck Analyzer GitHub <i>Python, AST, Graph Algorithms, Mermaid.js</i>	2026
- Engineered zero-dependency static analysis engine using standard library <code>ast</code> to parse function hierarchies, imports, and cross-module dependencies without code execution. - Implemented automated anti-pattern detection for nested loops and $N + 1$ database queries, rendering interactive architecture dependency graphs via Mermaid.js.	
K-HOG Unsupervised Keyframe Identifier (K-HUKI) Report <i>Python, OpenCV, ML</i>	2023
Engineered unsupervised keyframe extraction engine using HOG features achieving 96.45% accuracy, 11× faster than ResNet.	

Achievements & Leadership

Intermediate Winner — Awaiken Hacks 2023: Action comparison tool using MediaPipe for real-time posture analysis.

Rank 1 — Girlsript Bilaspur Hackathon "Hack4CG": Facial emotion recognition model for depression vulnerability detection.

Vice President — Google Developer Student Club (GDSC), GGU: Organized workshops in AI/ML and competitive coding.
